

ABOUT OUR COLOUR RANGE

All of the colours seen in this brochure are available to order in any of our paint products. These products are suitable for application onto PVCu, plastic, glass, GRP, metal and wood.

COLOURS FROM THE EARTH No. 1

Our standard colour range has been inspired by an array of natural forms that the Earth has produced. These forms include rocks, minerals, crystals and gems. The colours we have chosen for this exclusive collection have been inspired by the visual characteristics and physical purposes of these beautiful wonders, from both Earth and Nature. Whilst many of these forms are best known for their spiritual and healing properties, there is also a lot of science involved in the way these objects are formed, which is similar to our paint, as many different elements and scientific knowledge have been used to form and create our unique paint products.

Over time these buried treasures are naturally formed and all have many different properties. Most crystals are known to have healing properties and many minerals and metals we find in rocks have been essential to human civilization.

Modern technology, and our society as a whole, depends upon rocks and minerals as raw materials, whilst gems have been prized since antiquity for adornment and as symbols of status and wealth.

Whilst every effort is made to ensure the accuracy of the colour's seen in this brochure, variations may occur.

When ordering any colour, please specify both the colour code and name.

Random Fact's: Amethyst's purple hues have long made it a symbol of purity and royalty for rulers, clergymen, and the wealthy. Malachite was used by the Ancient Egyptians in jewellery pieces and was sometimes grounded up to make cosmetics, whilst in the Middle Ages, parents attached it to their children's beds to ward off evil spirits and witches.

**Please note these are metallic finishes*

105 Halite White

160 Clay

170 Gold*

110 Moonstone

115 Marble

180 Yellow Opal

185 Sulphur Yellow

120 Sandstone

125 Rose Quartz
